

# COVID-19 Vaccine changes

## Unvaccinated:

Anybody 6 months and older that has not had any COVID-19 vaccination or has not finished a primary series (2 doses of Moderna, 2 or 3 doses of Pfizer):

- **6 months to 5 years:** Depends on the type of vaccine, number of doses and age of the child. Visit with the child's provider or NCDHD staff to find out what they should receive.
- **6 years and older:** Should receive 1 (one) dose of Bivalent vaccine

# COVID-19 Vaccine changes

## Vaccinated:

Already vaccinated with 1 or more doses of any kind of COVID-19 vaccine:

- **Everyone 6 months and older** is recommended to have 1 (one) Bivalent vaccination. Must be at least 2 months from any previous COVID-19 vaccination
- **Persons 65 years and older** who have already had a Bivalent vaccine: can receive 1 (one) extra dose of Bivalent vaccine. Must be at least 4 months from last Bivalent COVID-19 vaccination

## Moderately to severely immunocompromised

Moderately to severely immunocompromised persons that have already had a Bivalent vaccine:

- **6 months and older:** have the option to get a dose of Bivalent vaccine every 2 (two) months. NCDHD encourages all people in this group to visit with their provider to see what is best for them.
